SUMMARY

MSc Financial Markets & Investments candidate (SKEMA × NC State, May 2026). Thesis on lead-lag in crypto perpetuals: three systematic strategies (+172 %, Sharpe 1.69 on the lead strategy) plus a Rust HFT cross-venue arb bot, all running live with personal capital. Seeking a 6-month Quant Trader / Systematic Researcher internship from June 2026, with view to full-time. Open to international relocation.

QUANT RESEARCH & LIVE TRADING

Cross-Sectional Lead-Lag, Daily (Hyperliquid Perpetuals)

Deployed live with personal capital

- Multi-asset long/short on ~220 Hyperliquid perpetuals; daily rebalance from a cross-sectional ranking on a rolling lookback.
- Walk-forward Feb 2025 → Apr 2026 (14 months, fees & spread modelled): +172% return, Sharpe 1.69, 385 cycles, 49.6% win rate, profit factor 1.26, 123 distinct assets.
- Live execution via Hyperliquid REST and WebSocket APIs (scheduled, ALO routing); risk module: vol targeting, drawdown circuit breaker, intraday stop-loss.

Session-Filtered Directional, 15-Minute (Hyperliquid Perpetuals)

Research

- OLS HC3 on $n = 436$ obs; lead-lag coeff significant at 5% ($p = 0.014$). Sharpe 2.51, profit factor 1.89, bootstrap-validated PF ($p = 3.5\%$).

Pairwise Vol-Spread, 1-Minute (Hyperliquid Perpetuals)

Research

- Optuna TPE search; IS / OOS: +14.5% / +6.8%, max drawdowns -0.81% / -1.99%.

Rust HFT Bot, HYPE → Polymarket Cross-Venue Arbitrage

Deployed live with personal capital

- Tokio async pipeline ingesting HYPE BBO from Hyperliquid and placing FOK orders on the matching Polymarket prediction market; EIP-712 signing on Polygon.

Polymarket Insider Detector — Behavioural Signal

Deployed live

- Real-time detector scoring Polymarket wallets for insider-like behaviour (fresh wallet < 7d, position $\geq \$1k$, concentrated capital, thematic dominance); calibrated on 766M trades / 2.19M wallets, 2022–2026 walk-forward (DuckDB). Telegram alerts + Flask dashboard.

EXPERIENCE

50 Partners (VC Analyst, Web3 vertical)

Paris, France | Jul – Dec 2024 (6 mo)

- Wrote research notes on Web3 primitives (FHE, account abstraction, DEX architectures), used by partners to qualify deal flow.
- Ran due diligence on early-stage startups: technical architecture, tokenomics, competitive positioning. Three of my files led to investments.

IbanFirst (FX Derivatives Sales Intern, Hedging desk)

Paris, France | Jan – Jul 2024 (6 mo)

- Structured >€50M of FX hedging products including exotic options for corporate clients. Owned the cycle from strategy design through pricing, structuring and execution.
- Restructured live hedging positions for corporate clients: optimised strike levels to fit updated market conditions, hedging horizons, and client budget constraints.

EDUCATION

MSc Financial Markets & Investments, SKEMA BS × NC State University

Raleigh (NC), US | 2023 – May 2026

Programme ranked 4th worldwide by the Financial Times five years in a row. Coursework: derivatives pricing, stochastic calculus, Python, portfolio optimisation, structured products, equity investment, crypto.

Bachelor in Economics & Management, Aix-Marseille University

Aix, France | 2022 – 2023

Preparatory Class (CPGE), Economics & Mathematics

Rennes, France | 2020 – 2022

SKILLS & CERTIFICATIONS

Languages: Python (advanced), Rust (intermediate, tokio async), Solidity, SQL (basics)

Python libs: NumPy, pandas, statsmodels, scipy, networkx, optuna, asyncio, matplotlib, scikit-learn, TensorFlow/Keras

Machine learning: supervised/unsupervised, neural networks, trees/XGBoost, clustering, recommenders, RL (deep Q-learning)

Rust crates: tokio, tokio-tungstenite, reqwest, sonic-rs, alloy (EIP-712 signers), tracing, crossbeam, ringbuf

Quant methods: walk-forward validation, bootstrap resampling, HC3 robust standard errors, pooled OLS, vol targeting, drawdown circuit breakers, transaction-cost modelling, Sharpe and profit-factor stress-testing

Trading infra: Hyperliquid REST and WebSocket APIs (BBO feed, dual redundant connections), Polymarket CLOB API (EIP-712 auth, FOK orders), TCP_NODELAY, lock-free SPSC buffers

Certifications: CFA Level II (2025); ML Specialization – DeepLearning.AI / Stanford, 2026; Bloomberg Market Concepts (BMC)

Languages spoken: French (native); English (fluent); Mandarin (intermediate)

ACTIVITIES & INTERESTS

On-chain research and DeFi • Poker (game theory) • Kitesurf • Uniswap Hook Incubator, cohort 3 (Stylus award)
